Profile

Detail-oriented Software Engineering student with a strong foundation in problem-solving and algorithmic thinking, transitioning into Frontend Development. Proficient in HTML, CSS, JavaScript, and React ecosystem (Hooks, Zustand). Backed by hands-on experience in backend integration and RESTful APIs (FastAPI), enabling seamless communication with backend teams. A fast learner familiar with Agile principles, eager to contribute to dynamic frontend projects and continuously improve clean coding practices.

Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript, **React.js**, React Router, Redux
- **Familiar with:** Tailwind CSS, Responsive Web Design, Figma (UI/UX)
- **Backend & APIs:** FastAPI, Django, ASP.net Core

Selected Projects

Mirbagheri Sohan Corporate Website | React, Zustand, Tailwind CSS

- Developing a fully responsive corporate website for a local business to establish their online presence.
- Implementing global state management using Zustand and styling the user interface with Tailwind CSS.
- Structuring mock APIs and JSON data to simulate client-server data flow, ensuring seamless future integration with a real backend system.

Paper Trail (Task Management App) | React, React Router, AI-Assisted UI

- Built a dynamic Todo application featuring task creation, status tracking, and analytical summaries.
- Managed client-side routing with React Router and structured complex frontend logic and components.

Joft-o-Joor (Card Matching Game) | React, Hooks, State Management

- Developed an interactive web-based memory game to demonstrate proficiency in handling frontend logic.
- Utilized React Hooks effectively to manage intricate application states, user turns, and asynchronous matching conditions.

Experience

INDEPENDENT SOFTWARE DEVELOPER (FREELANCE) | QOM, IRAN | DEC 2025 – PRESENT

- Developing and maintaining "Sangestan," a production-level desktop application for the stone industry using Flutter.
- Implementing UI components and managing application state for offline-first workflows.
- Continuously iterating features, fixing bugs, and improving system stability based on direct feedback from real users.

AI & COMPUTER VISION INTERN | UNIVERSITY OF QOM | JUN 2025 – FEB 2026

- Contributed to the development and deployment of real-time computer vision pipelines on edge devices (NVIDIA Jetson).
- Focused on system optimization, integrating complex modules into a unified system, and solving algorithmic challenges.

Education

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING | UNIVERSITY OF QOM | OCT 2023 – EXPECTED 2027
